Education

Bennett University — **Aug. 2023 - Jun. 2027**
Bachelor of Technology in Computer Science and Engineering — Greater Noida, Uttar Pradesh

Technical Skills

Languages: Python , C++ , JavaScript , SQL

Frameworks & Libraries: React.js, LangChain, LangGraph, FastAPI, Next.js, PyTorch , Scikit-learn, Pandas, Node.js, NumPy FAISS, LangSmith.

Databases: PostgreSQL, MongoDB, FAISS, ChromaDB, Neo4j

Tools & Platforms: Git, GitHub, Docker, Postman, Jira, Docker, Render, AWS(Basic) MCP Servers, Guardrails,DVC, Dagshub, MLflow.

Interests: Large Language Models, Generative AI, Agentic AI Systems, High-Level-Design(HLD)

Experience

Primus Software Development — Jan 2026 - May 2026
Software Developer Intern

- Developed an end-to-end Network Security / Phishing Detection system using Python and Scikit-learn, implementing data ingestion, validation, model training, and evaluation workflows.
- Integrated MongoDB, MLflow, DagsHub, FastAPI, Docker, AWS S3, and GitHub Actions to build a scalable ML pipeline with experiment tracking, API serving, and automated deployment.

Projects

TripCrew AI | Live Demo | GitHub
Python, LangGraph, LangChain, MCP, FastAPI, PostgreSQL, Groq, Tavily, AviationStack, Docker,HITL

- Engineered a multi-agent AI travel planner using LangGraph, coordinating specialized agents for flight research, hotel discovery, itinerary planning, and final response generation.
- Integrated MCP-based tool execution, guardrails, and Human-in-the-Loop (HITL) workflows to introduce controlled and reviewable agentic decision-making.
- Built a FastAPI-based application with PostgreSQL conversation persistence and real-time integrations with AviationStack and Tavily for flight and travel research.

TradeMind | Live | Github
Python, LangGraph, MCP, OpenAI Agents, Google ADK, Groq, FastAPI

- Built a multi-agent AI trading system for market research and opportunity analysis.
- Integrated MCP tools and LLM agents for automated trading workflows.
- Designed a modular agentic architecture with FastAPI backend.

Deep Research Agents | Live Demo | Github
Python, OpenAI Agents SDK, Gemini, Gradio, Tavily, AsyncOpenAI

- Built an AI deep-research agent that autonomously searches and analyzes web sources.
- Integrated Tavily and LLMs for multi-source information gathering and synthesis.
- Generated comprehensive research reports through an agentic workflow.

Achievements

- Secured 1st Prize at the HackStack Hackathon
- Ranked 19th at Hackaccino-2023 (SIH)
- Ranked among the Top 200 participants in Bennett University's GeekCode 2.0 DSA Competition
- Solved 300+ DSA problems on LeetCode, covering arrays, strings, linked lists, trees, sorting, binary search, and BFS/DFS.
